

Inauguration of the new cable accessory training centre up to 145kV

On Oct 29, 2012 we had the pleasure to inspect and audit the new cable accessory training centre up to 145kV at Cable Services in Wrexham. This new local UK training capability is another milestone in the HV growth initiative and TE Connectivity has found the right partner for such an investment, in Cable Services. This local training capability will speed up Time-To-Market support and give great added value to our customers, utilizing expertise from both companies.

Ronnie Fotheringham, Regional Sales Director UK, Middle East Africa, and Dr. Robert Strobl, Global Market Director Power Transmission, approved the new training centre and congratulate Nick Firth, Sales and Technical Director of Cable Services, for this outstanding commitment to support the TE Connectivity UK High Voltage growth strategy.

October 29, 2012

Dr. Robert Strobl, MBA
Market Director Global Power Transmission
Tyco Electronics Raychem GmbH, Ottobrunn/Munich, Germany
